Introduction

To exploit the full potential of "birds of paradise" you must enable the kerning recognition in your word processing software.

## How to enable kerning in adobe software ?

When you use "BoP" in photoshop and that kerning is not enabled by default you get this :

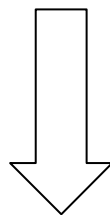

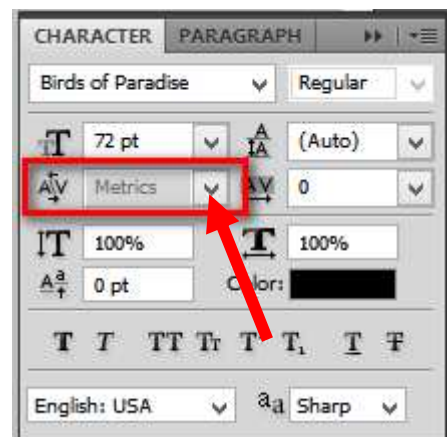

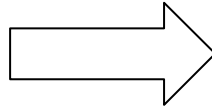

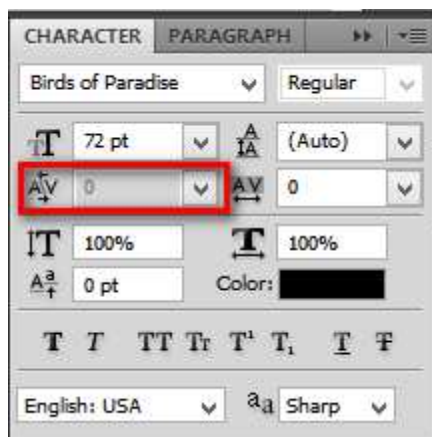

To get the kerning enabled, do as follow :

Windows -> Character panel

The character panel opens (picture below). Framed logo is the element that controls the kerning of the font

Select all your text and set this element to "Metrics"
